

Tail Design

Horizontal Tail

Your horizontal tail should have about $1/4^{\text{th}}$ of the area of your wing. Determine a span and chord that will give you an area equal to $1/4^{\text{th}}$ of your wing, and label your span and chord on the drawing .

Vertical Tail

Your vertical tail should have about $1/10^{\text{th}}$ of the area of your wing. Determine height and width that will give you an area equal to $1/10^{\text{th}}$ of your wing, and label these on the drawing.
