Office of U.S. Senator Jon Ossoff

DR. JOE RICHARDSON
MODERATOR

20 OCT 2023

9:00am - 12:00pm

Museum of Aviation
Century of Flight Hangar

The "digital trinity" — digital engineering and management, agile software, and open architecture — is the true successor to stealth: the next big paradigm shift for US tech dominance. Rather than just building better systems, it builds systems better — opening doors to faster design, seamless assembly, and easier upgrades. This is certainly important to advancing our national security and sustaining our military edge, but just as important for ensuring the global competitiveness of our industries and workforce overall. Connecting our industries to these principles…..and then connecting our generations, the people to see these principles to the future... to ensure they evolve and continue to innovate, is the focus of this discussion.

PRESENTED BY

Museum of Aviation Foundation

Georgia Tech · Ivan Allen College of Liberal Arts
Sam Nunn School of International Affairs

Robins Air Force Base 21st Century Partnership
